* YEAR! *
*****
```

## Happy GNU Year!

Happy GNU Year everyone! I made this at the request of John Sullivan for the 2012 new years' Free Software Supporter.

Added on 2012-02-08.

Cory Doctorow/Little Brother/1

and come pouring out of my fingertips, no sweat and fuss -- but it wasn't nearly as much fun as I'd thought it would be. There were days when I wrote 10,000 words, hunching over my keyboard in airports, on subways, in taxis -- anywhere I could type. The book was trying to get out of my head, no matter what, and I missed so much sleep and so many meals that friends started to ask if I was unwell.

When my dad was a young university student in the 1960s, he was one of the few "counterculture" people who thought computers were a good thing. For most young people, computers represented the de-humanization of society. University students were reduced to numbers on a punchcard, each bearing the legend "DO NOT BEND, SPINDLE, FOLD OR MUTILATE," prompting some of the students to wear pins that said, "I AM A STUDENT: DO NOT BEND, SPINDLE, FOLD OR MUTILATE ME." Computers were seen as a means to increase the ability of the authorities to regiment people and bend them to their will.

When I was 17, the world seemed like it was just going to get more free. The Berlin Wall was about to come down. Computers -- which had been geeky and weird a few years before -- were everywhere, and the modem I'd used to connect to local bulletin board systems was now connecting me to the entire world through the Internet and commercial online services like GEnie. My lifelong fascination with activist causes went into overdrive as I saw how the main difficulty in activism -- organizing -- was getting easier by leaps and bounds (I still remember the first time I switched from mailing out a newsletter with hand-written addresses to using a database with mail-merge). In the Soviet Union, communications tools were being used to bring information -- and revolution -- to the farthest-flung corners of the largest authoritarian state the Earth had ever seen.

## Little Brother by Cory Doctorow

Cory Doctorow's young adult novel about a dystopian future that very nearly resembles our present day, and some young activists who try to take down that system.

# CENTRALIZED SERVICE

Twitter, Facebook, Flickr, YouTube, etc

--VS--

# FEDERATED NETWORK

Email, Jabber/XMPP, StatusNet/OStatus  
... the web is supposed to be too!

Thanks for the images, Tango Project!

**Where did you come from?**

# Free software activists

**WE'RE IN YOUR INTERNET**

**DECENTRALIZING YOUR MEDIAS**

**Part of a W3C working group**

**We're going to have standards!**

**And not just for ourselves.**

**Diaspora, Friendica, GNU Social  
...and new projects that might  
emerge**

# Prevent a sad internet

## Think of the kittens

**Sounds too good to be true.  
Is it actually made of kittens?**

**It's python & SQL with a Django-like  
framework that works with pump.io  
...and it's plugin-able, AGPL code**

**How can I help?**  
**(I'm so glad you asked!)**

# **Crowd-funding, grants & customization work**

**Join our goblin force...**

**... and help us start a media revolution!**

**We want you! Help us with; user testing, bug triage, documentation, translation, blogging, coding, grant writing, user support, design and more!**

**We especially want more artists!**

**MediaGoblin aims to be an easy to install, freedom-respecting, multi-media hosting service for artists.**

**We hope you'll join us!**
